YUNG YU HEARS : FROM RUSSIA

Czar's Advisers Say Their Interference Saved Lives.

LI HUNG CHANG A WISE MAN

SUCCESSOR IS ASKED TO PURSUE SAME POLICIES.

Victoria B. C .- Jan. 8 .- According to advices from Kaifeng-Fu by the Em-press of India, the Tung Wen-Hupao pub, shes a confidential letter addressed to the grand counselor, Yung Yu, by the Russian minister, M. Lessor, iraediately after the death of the lat Li Hung Chang. The document is said to have been obtained from Japanese

"As your excellency is doubtless aware, the territories of our two countries are in touch with each other and among foreign countries Russia is the nearest neighbor of China from a geonearest neighbor of China from a geographical point of view, everything that affects the in rests of the one equally affects those of the other. In consequence of this Russia has always looked forward to the day when China, may be prosperous and powerful. Unfortunately, the Boxer disturbances broke out last year and all the foreign powers took advantage of the occasion to send their hostile armies into China. Though we tried to refrain from participating in the expedition in vain, we labored most strenuously to persuade the allied forces to evac ate Pekin as soon as the legations had been relieved. Subsequently, when the Japansoon as the legations had been re-lieved. Subsequently, when the Japan-ese attempted to match the power of policing the city of Pekin from the hands of the Chinese authorities, we stood obstinately in their way and so their unreasonable attempt was frus-

"The late Li Hung Chang was a very far-sighted and able statesman, who had always been on friendly terms with us, because he knew that Russia was the only true friend of China. With regard to Manchuria, it is a place where the present dynasty has had its origin. How can the Chinese govery ment permit a number of wolves and tigers to intrude into this important province of the Chinese emperc?"
"But we knew that unless we stepped forward China would be powerless against these wolves and tigers. Wh, therefore, made haste in dispatefung a

"It is not within her power to raise sufficient funds to organize and maintain a strong army in Manchuria to defend it. But unless Manchuria is strongly garrisoned it is impossible to prevent foreign powers from casting a greedy eye on the province. It is for this reason that Russia Insists on keeping this important territory under her nominal control till China is atrong enough to take it back.

"If we disregard the welfare of China and evacuate Manchuria at the present moment, I am sure that no sooner have our troops left the place than those of some one or another of the foreign powers will step in and make a permanent occupation. This statement, it is expected, will be a sufficient explanation why we refuse to give up Manchuria now."

MANY GOVERNMENT CLERKS WHO DRAW WAGES IN LIEU OF PENSIONS

(Special Correspondence.)
Washington, D. C., Jan. 5.—An effort will be made during this session of congress to pass a bill providing for civil pensions for government clerks. Under the provisions of this bill a fund is to be created by taking 2 per cent from the salaries of the clerks, and the serietary of the treasury department 331 are over 70 years to dian of the fund. It may be said that the proposed measure has not the unanimous support of government clerks, and while many favor a civil pension list, there is a strong opposition to the idea entertained by many others.

It is undoubtedly true that the government would be the gainer should it pension employes at the age when their the proposed civil pension will be manifested to the proposed civil pension will be manifested to the proposed civil pension bill to defeat it.

Services are not worth the salaries paid them. A report recently made by the scartaard coin. The diseases most feared are those which are inherited—handed down from generation to generation, and family to family. By far the most destructive of these is Cancer, which finds the eatest number of its victims among the children d grand-children of those whose blood was tainted

and grand-children of those whose blood was tainted
with this dreadful malady. You may carry this poison in the blood for years, but
as the vital powers begin to wane a slight bruse or cut, wart or mole, sore or
pimple may develop into Cancer. From middle life to old age is the time when
the slumbering poison is most apt to break out, a sore or ulcer often degenerating
into Cancer, and Tumors become more progressive and ulcerate through the skin,
the sharp, shooting pains causing the most intense suffering.

The Cancer patient naturally grows despondent as one after another the usual
remedies fail, and the sore shows no sign of healing. The impurities that have
been accumulating in the system, perhaps for generations, cannot be eliminated nor
the poisoned blood made pure by salves, washes and plasters. The proper treatment
is to purify and build up the blood, remove the cause, when the sore or ulcer heals.
S. S. goes directly

Mr. J. B. Arnold, of Greenwood, S. C., writes: "A | into the blood, de tiny ulcer came, just under the left eye. It began spreading, and grew worse rapidly, destroying the fiesh as it went. As Cancer is hereditary in my family flesh as it went. As Cancer is hereditary in my family I became thoroughly alarmed, consulting the best physicians and taking many blood medicines, none of which did me any good, when one of our leading druggists advised me to try S. S., and by the time I had taken the second bottle the Cancer began to show signs of healing, the discharge grew gradually less and finally ceased altogether, the scre dried up and nothing remains but a slight scar. I feel that I owe my life to S. S. S."
